# Practical 01 Creating account, repository on Github and cloning repository in Github Page.
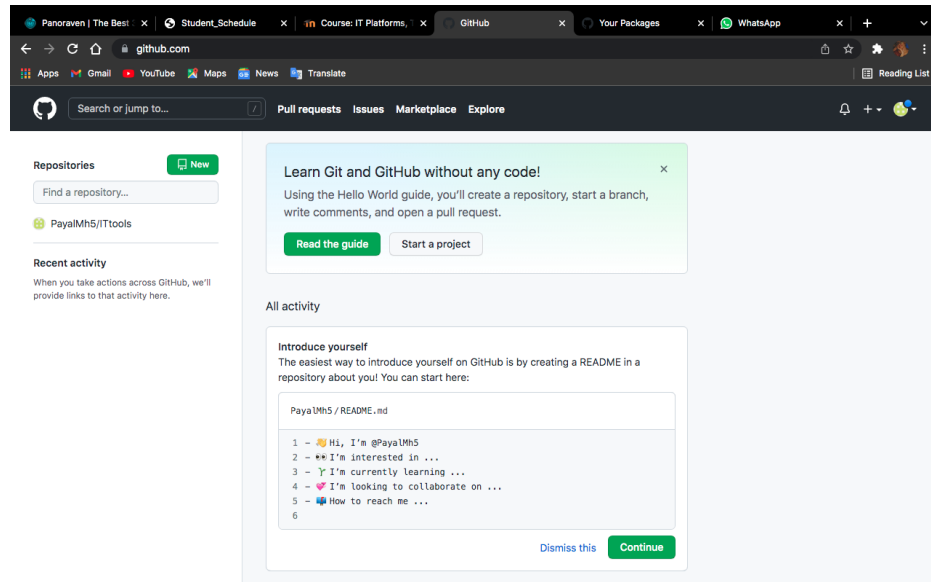

Creating Account -

- Go to github.com on your web browser.
- Click on Sign up
- Enter the details asked.
- Click on 'Create Account'
- Verify your E-mail id.
- Select your preferences and submit.

# Creating Repository and cloning repository :-
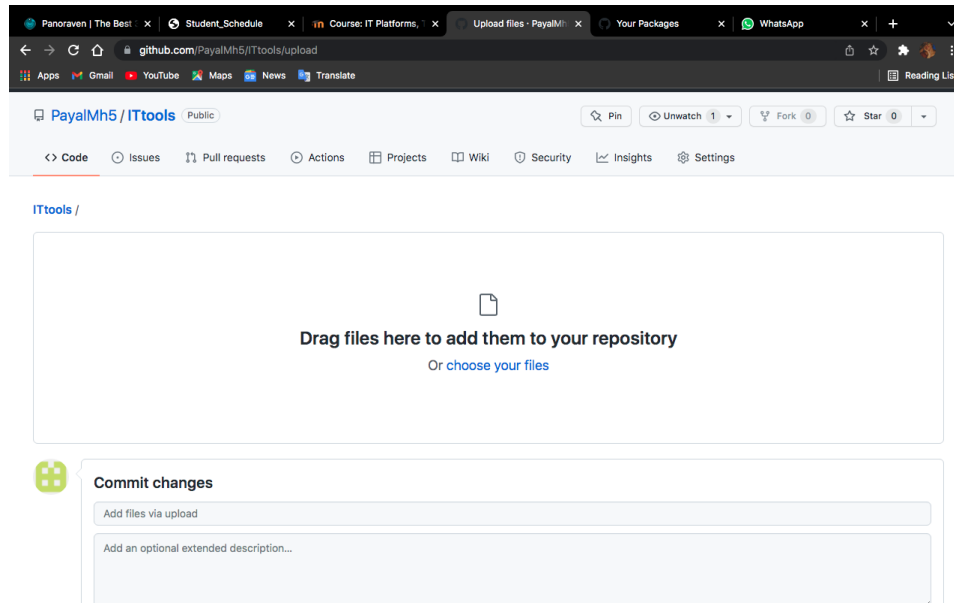

- Login into your github account.

- Click on New repository option.

- After clicking New repository, name your project and choose the visibility and click on 'Create Repository' button.

- Now click on the 'Upload files' button and choose the file you want to upload.

- After that now 'Click on commit changes' and you can see the uploaded files.
- To clone the repository select the link visible and paste where you want.
